		Examiner	Art Unit				
		Matthew E. Rodger					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for R ply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 6-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the rotary actuator" in lines 7 and 8. There is insufficient antecedent basis for this limitation in the claim. Claim 1 does not previously positively recite a rotary actuator.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 09/913,865

Art Unit: 3677

Claims 1-5, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,518,180 to Kleefeldt et al (hereinafter Kleefeldt). Kleefeldt shows a power door latch assembly having a ratchet (2), a pawl (3), a drive actuator (17, 17a, 18, 18a, 18b, 21, 21a), a drive controller (24), and a rotary actuator (9). The ratchet (2) has at least one detent surface (7, 8) and biasing means (16). The drive actuator has a prime mover (17) and an output member (18) in engagement with the rotary actuator (9) through a pin (9b). A releasable coupling (23) is coupled in parallel with the drive mechanism (17a, 21, 21, 18) of the drive actuator and between the primary mover (17) and the output member (18). A drive controller (24) is coupled to the releasable coupling (23). The rotary actuator has a cinching arm (10) engaging the ratchet (2) through a bar (15) and a releasing arm (11) engaging the pawl (3). The rotary actuator (9) has a null position where it does not engage either the ratchet or the pawl. The drive controller disengages the prime mover from the rotary actuator. The rotary actuator (9) includes a lost motion linkage (space between arms 10 and 11 where pivot c has freedom of motion) limiting the movement of the ratchet. At least one of the detent surfaces (8) is capable of holding the ratchet in a partially open position.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew E. Rodgers whose telephone number is (703) 306-3406. The examiner can normally be reached on regular work hours.

Application/Control Number: 09/913,865

Art Unit: 3677

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, J. J. Swann can be reached on (703) 306-4115. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9326 for regular

communications and (703) 872-9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-2168.
